Re: Application for Cloud Engineer Intern

Dear Hiring Manager,

I am writing to express my enthusiasm for the **SAP iXp Intern – Cloud Engineer Intern Position** at Vancouver location. With a solid educational foundation in Applied Computer Science from Dalhousie University and extensive practical experience with cloud technologies and software development, I am eager to contribute to and learn from one of the leaders in cloud solutions.

During my tenure as a Software Developer at TechNet Consultancy and a Web Developer at the Institute of Plasma Research, I honed my skills in developing scalable applications and implementing robust solutions using technologies such as **Java, Spring Boot, AWS, and Docker**. I have designed and deployed highly efficient APIs and optimized web applications to enhance performance significantly, aspects critical to thriving in a cloud-centric role like the one offered by SAP.

My projects, including the development of a serverless multi-cloud Trivia Titans application and an automated podcast transcription application, showcase my ability to innovate and execute complex solutions in cloud environments. These experiences have ingrained a strong understanding of **Agile methodologies, CI/CD pipelines**, and proactive problem resolution, all of which are pivotal in the fast-paced setting at SAP.

I am particularly drawn to this internship because of SAP's commitment to innovation and its inclusive culture. I am excited about the opportunity to work alongside seasoned professionals and believe my background in both front-end and back-end development positions me uniquely to make a substantial impact at SAP.

Thank you for considering my application. I look forward to the possibility of discussing this exciting opportunity with you. I am available for an interview at your earliest convenience and can be reached by above contact details.

Warm regards,

Jay Rana
